

E-Rate Made Easy

Make Your Existing Resources Work Harder with weDireq

The weDireq System allows your district to maintain a centralized library of multimedia information, and to distribute information from the library to outlying schools and classrooms in a digitized format. Using the weDireq web browser, all authorized system users can view the digitized media, dramatically expanding access to your district's existing resources.

'Must-Have Technology' According to CoSN

The Consortium for School Networking (CoSN) has named **datacasting** as one of the 'must-have' technologies in the 21st century classroom. The weDireq media distribution system fits CoSN's model for datacasting, delivering teacher-selected educational materials with broadcast-quality video and sound.

Included in the SLD's Eligible Products Database

Take the guesswork out of your e-rate application! Up to 90% of the weDireq system is eligible for funding, and the eligible components* have been approved by the SLD for inclusion in the Eligible Products Database. See the USAC website for more information: <http://www.sl.universalservice.org>.

Why System Concepts?

E-Rate Experience

With our technical savvy and on-line project management tools, System Concepts, Inc. provides zero slippage and 100% accountability. Our careful attention to detail and determination to remain current in the ever-shifting E-Rate landscape make us the partner of choice for your E-Rate eligible hardware needs.

Beyond E-Rate

At System Concepts, Inc. (SCI) we rock! We deliver systems integration services for video, voice, data and security networks as well as professional services that cover E-Rate eligible products and services, and E-Rate compliance documentation, and we just happen to be a Certified Women Business Enterprise (WBE).

Serving the educational community since 1993, SCI is known for quality services and as systems integrators we deliver high quality video, data, security systems, and control systems.
